```cpp
#include <stdlib.h>
using namespace std;
//
// structure: _data_copy, used to encapsulate a copied data and it's size.
//
struct _data_copy {
        unsigned int _size;
        void * _data;

        _data_copy(){
                _size=0;
                _data=NULL;
        }

};
```
